

THE ULTIMATE AUTOMOTIVE ACCESSORY

NOISY CARS GET QUIET • CHEAP CARS FEEL LUXURIOUS • OLD CARS RIDE LIKE NEW • HOT CARS AND TRUCKS BECOME COOL • SUBS HIT HARDER

EVERY CAR *Becomes* A BETTER CAR

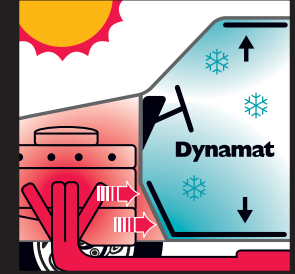

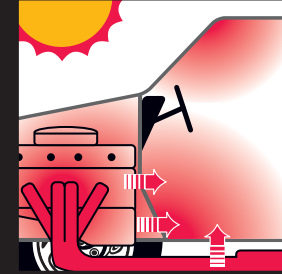

Your vehicle looks great and runs great. Would you want it to drive and feel like a newer, more expensive luxury vehicle? Of course you would! But is it even possible? No one ever thought it would be possible until Dynamat, an amazing energy conversion product, was developed by Dynamic Control. Now automotive enthusiasts, like yourself, can take your vehicle to the next level of comfort and enjoyment.

Dynamat makes your car ride and feel more solid. Dynamat lowers road noise, makes your audio system sound better and louder and helps keep your vehicle cooler. Every vehicle can be upgraded with Dynamat, from an old truck to a Mercedes Benz. Solid, quiet comfort can be installed. You and your friends won't believe the difference!

Hot Cars Become Cool!

Noisy Cars Get Quiet!

Discover the Dynamat Difference.

In the 1980's, Dynamic Control introduced Dynamat as a noise and vibration solution to a broad range of industries including the automotive aftermarket, the mobile electronics market and the computer industry establishing Dynamat as the number one brand and most recognizable name in acoustic materials. Dynamat is recognized by consumers around the world as the highest quality product for solutions to unwanted noise and vibration. Dynamat -- for better sound everywhere.

IN THE LAB

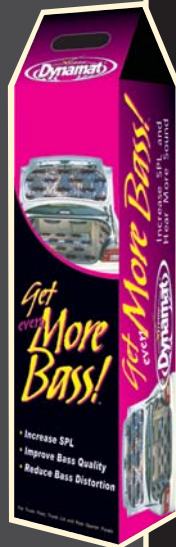

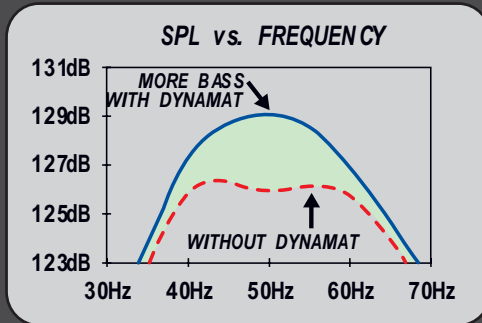

With our critical analysis and "Real World Testing Lab", we are uniquely suited to be the acoustic solutions leader. Our ongoing research and development insure that Dynamic Control will always produce the most effective and efficient materials to resolve your sound quality, noise and thermal energy problems.

Get MORE WITH SPECIFIC KITS

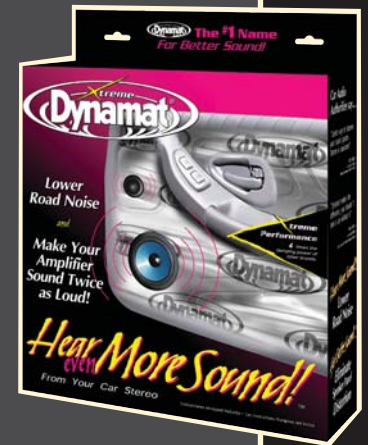

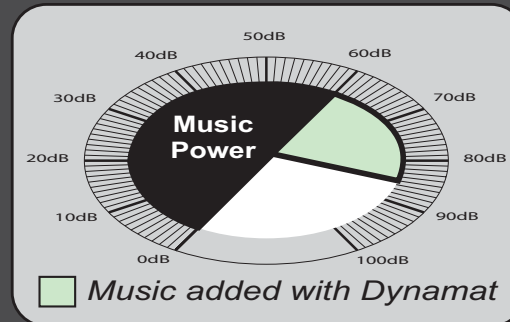

NEED MORE BASS?

Low SPL results when your subwoofer causes vibration and movement of your vehicle's body panels. When the vehicle's panels are stabilized by a Dynamat More Bass Kit, you get the tightest, loudest bass that your subwoofer can produce.

NEED MORE SOUND?

A Dynamat More Sound Kit restores as much or more dynamic range (dB's) as a new amplifier that is double the wattage of your old system. Dynamat will maximize your total system and give you more amplifier power.

DYNAMAT
WALL·TO·WALL
AND
Get it all!

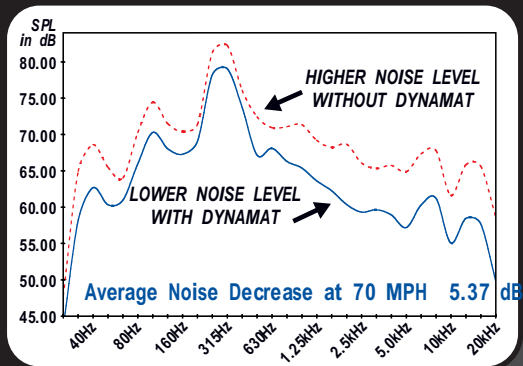

NEED BETTER SOUND?

Even the best speakers create vibrational distortion. High quality car audio depends on the right installation materials. Your new speakers will sound their very best with a Dynamat Better Sound Kit.

Dynamat™

Dynamat Xtreme should be used on any and all interior sheet metal of your vehicle. Xtreme is the highest efficiency sound deadening material available and more effective at stopping noise and vibration than other products. The aluminum constraining layer is very moldable and conforms easily to all interior surfaces. The extra sticky patented butyl layer is formulated with VECTOR™ chemistry for the most amazing energy conversion capabilities ever. Use it on doors, floors, roofs, hoods and trunks for a really quiet, cool and incredibly solid ride.

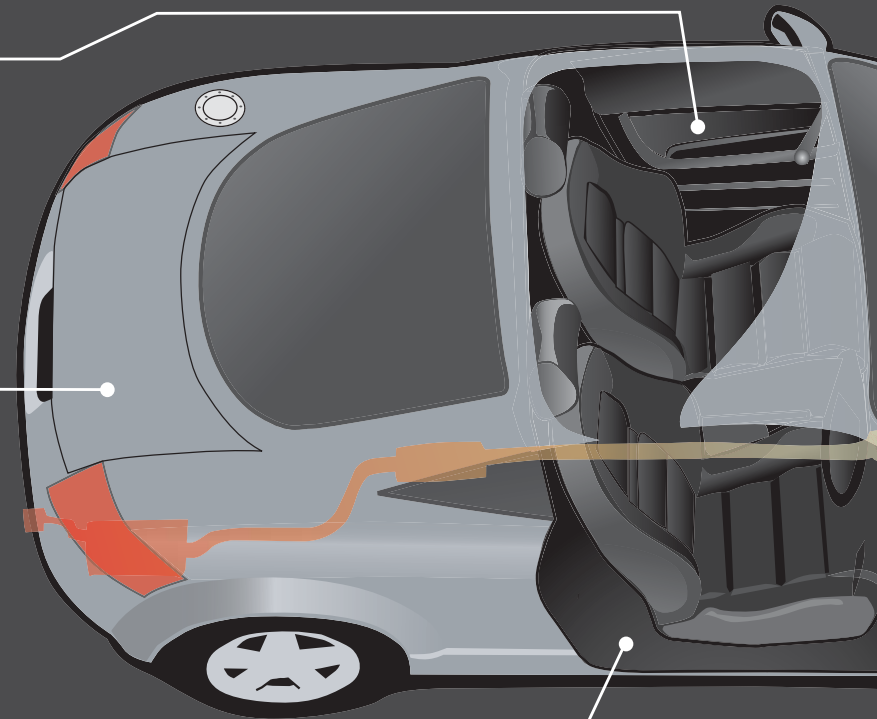

DOORS

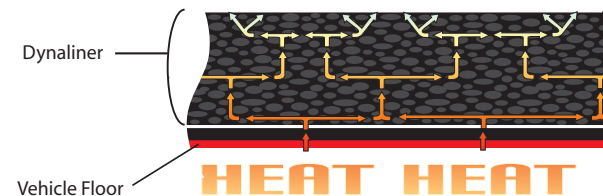

TRUNKS

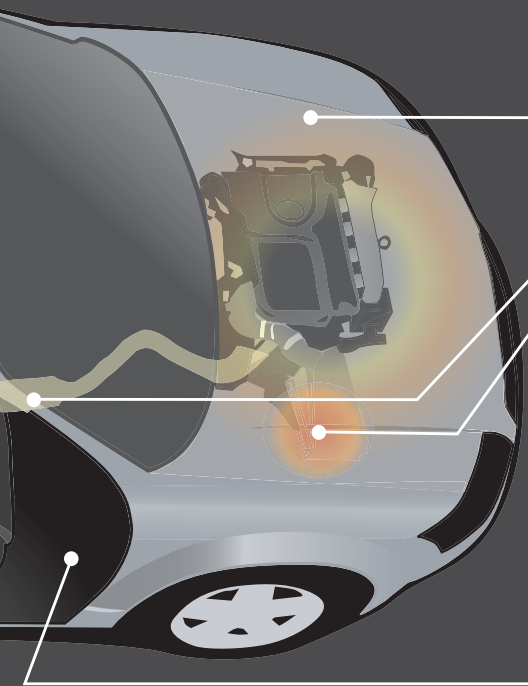

FLOORS

COOL COOL

Beat THE HEAT

DynaShield™

Looking to block intense heat from turbos, mufflers, catalytic converters and exhaust systems? DynaShield is a versatile barrier which can be used to stop heat at the source and keep your passenger compartment cool. A mechanically bonded, triple layer protective shield comprised of flexible aluminum armor, Fire Fibre™ core and aerospace adhesive, DynaShield provides maximum heat resistance. DynaShield is available in a variety of sizes and can be easily cut and molded to custom fit specific applications.

NEW Dynaliner™

The all new Dynaliner is the perfect light-weight super insulator to use on top of Dynamat. This durable crush and tear resistant material has the highest heat blocking properties available in a single layer synthetic foam-type material. Dynaliner isn't affected by oil and does not absorb water. Dynaliner provides acoustic absorption and excellent thermal insulation for roof, firewall, floor, quarter panels, doors and even as a hoodliner. Available in 1/8", 1/4" and 1/2" thickness.

Extremeliner™ & DynaPad™

Looking for extra cool & quiet? Extremeliner and DynaPad are both four part composite barriers providing maximum acoustical attenuation and excellent thermal insulation. These heavier materials utilize "Dissimilar Layer Insulating" technology that solves two of the most difficult automotive problems; exhaust system heat and low frequency noise. Use both primarily on the floor and firewall for cool comfort. Extremeliner: 1lb/sq.ft. lead barrier. DynaPad: 1lb/sq.ft. vinyl barrier.

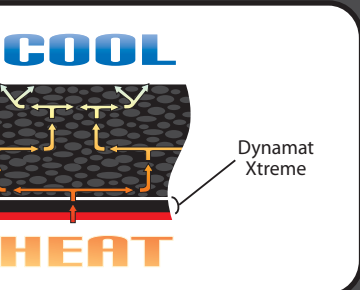

NEW Dynaliner™

The new Dynaliner can be used under the hood with results equal to The Hoodliner. If the OEM look is what you desire, the flat black finish of the new Dynaliner is the perfect alternative to the shiny finish of The Hoodliner.

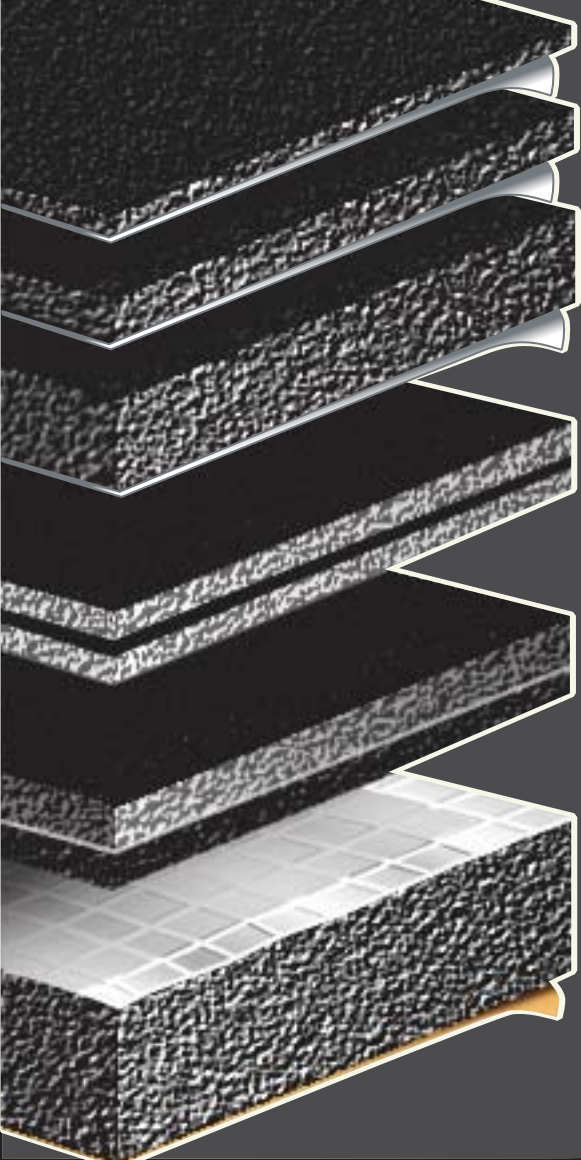

The Hoodliner™

Protect your hood's paint and reduce irritating noise with The Hoodliner. The sound soaker foam absorbs engine noise while the aluminized outer skin creates an easily cleanable water and oil barrier.

GET THE RIGHT MATERIAL FOR THE JOB!

Energy Absorbers

Dynaliner

A high efficiency, general purpose thermo-acoustic foam available in 1/8", 1/4" and 1/2" thickness. Dynaliner provides high acoustic absorption and excellent thermal insulation for roof, firewall, floor, quarter panels, doors and more. Sheet sizes: 32" x 54" (12 sq.ft.) Self-adhesive.

DynaPad

A four layer composite barrier material utilizing a 1lb/sq.ft. vinyl barrier between two layers of 3/16" thick acoustic foam with a urethane top facing. For low frequency and thermal control. Sheets size: 32" x 54" (12 sq.ft.) Non-adhesive.

Extremeliner

A four layer composite barrier material consisting of 1/8" thick neoprene foam, .015" thick dead soft lead, .25" thick acoustic foam and a .003" thick urethane top facing. The ultimate low frequency and thermal control material. Sheet sizes: 24" x 36" (6 sq.ft.) Non-adhesive.

Hoodliner

A 3/4" acoustic sound soaker foam with an aluminized reinforced skin that is cleanable and oil and water resistant. Hoodliner has a high-tack pressure sensitive adhesive for easy peel and stick application. Sheet size: 32" x 54" (12 sq.ft.) Self-adhesive.

Xtreme Dynamat

Dynamat Xtreme is a patented elastomeric sound deadener. Xtreme has a .060" thick layer of butyl and .004" thick aluminum face. Xtreme has the highest efficiency sound deadening properties available. Sheet sizes: 10" x 10", 12" x 36" & 18" x 32" Self-adhesive.

Original Dynamat

Dynamat Original is a .070" thick styrene-butadiene, rubber extensional sound deadener. Dynamat Original conforms and molds very well to interior surfaces. Sheet sizes: 10" x 10", 11.5" x 32", 18" x 32" and 32" x 54" Self-adhesive.

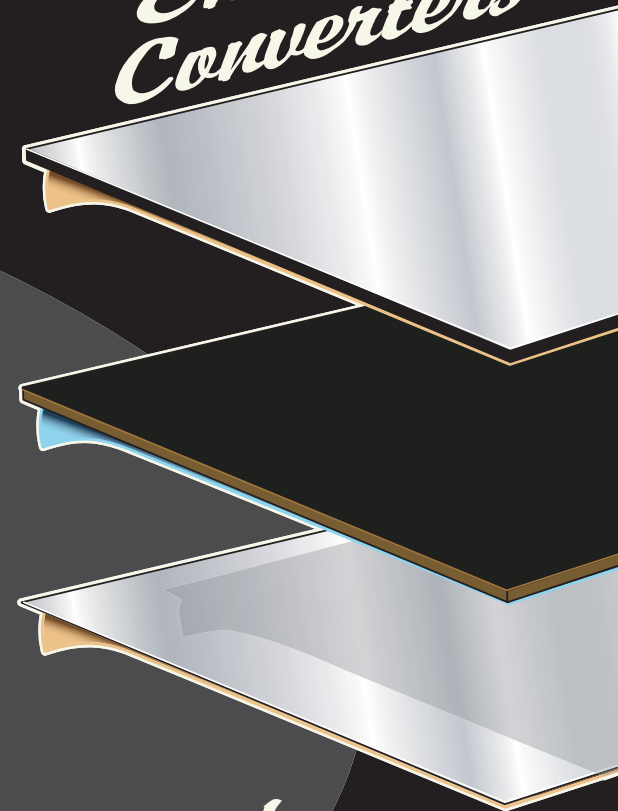

Dynaplate

Dynaplate is a super lightweight solid aluminum sound deadener. Dynaplate is .014" thick and weighs less than .2 lbs per square foot. Sheet size: 24" x 30" (5 sq.ft.) Self-adhesive.

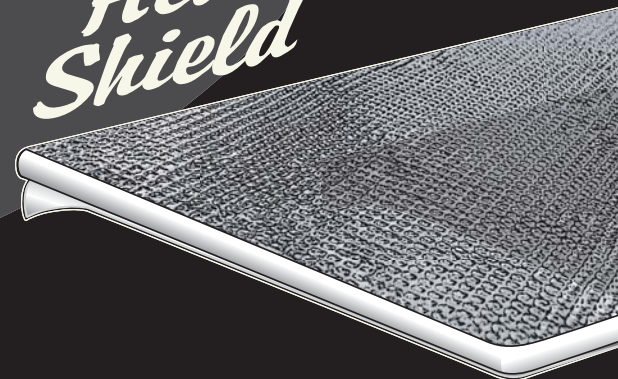

DynaShield

DynaShield is a multi-layer heat shield comprised of .010" thick flexible aluminum armor, 1/4" thick mechanically bonded Fire Fibre™ core and aerospace adhesive. DynaShield provides optimal heat resistance from high temperature areas such as turbos and exhaust systems. Sheet sizes: 12" x 10", 12" x 24", & 18" x 20" Self-adhesive

Energy Converters

Heat Shield

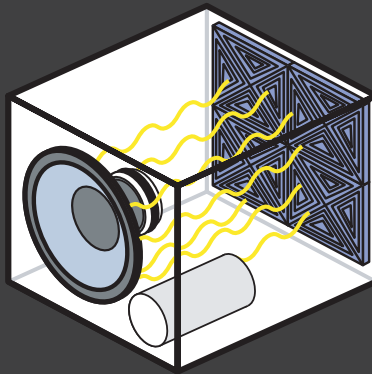

LOOK *There's more*

DynaXorb™

DynaXorb eliminates speaker back-wave distortion using sonic stealth technology. Removing the back-wave distortion from the speaker allows it to produce the full quality potential it was designed for, and deliver all the sound you paid for!

Covering the back wall of a subwoofer enclosure with DynaXorbs will eliminate the back-wave distortion. The result is clear, uncolored, accurate, tight bass. DynaXorbs are especially important inside ported enclosures because the back-wave distortion can easily escape through a port.

DYNASpray™

Want an easy solution for sound deadening and thermal insulation in those hard to reach areas? DynaSpray is a water based, ceramic coating that can be sprayed as an interior treatment, an undercoating or used under the hood.

NEW

DynaSpray can be left as flat black or finish painted. This multi-purpose liquid is very durable and contains rust inhibitors for long lasting protection.

COOL STUFF AND TOOLS

PERFORMANCE AUTOMOTIVE & RESTORATION PRODUCTS

Dynamat Quiet Comfort

Item	Part No.	Description
XTREME SHOP PAK	20410	4 squares (10" x 10" ea.)
XTREME WEDGE PAK	20425	1 sht. (18" x 32") 4 sq.ft.
XTREME TRI-PAK	20445	3 shts. (18" x 32" ea.) 12 sq.ft.
XTREME BULK PAK	20455	9 shts. (18" x 32" ea.) 36 sq.ft.
DYNASPRAY [®] JUG	12025	Sprayable 2.64 Gallon (10 liter)

Dynamat Cool Comfort

Item	Part No.	Description
DYNALINER [®] 1/8"	11101	1 sht. (32" x 54") 12 sq.ft.
DYNALINER [®] 1/4"	11102	1 sht. (32" x 54") 12 sq.ft.
DYNALINER [®] 1/2"	11103	1 sht. (32" x 54") 12 sq.ft.
EXTREMELINER [®]	21205	1 sht. (24" x 36") 6 sq.ft.
THE HOODLINER [®]	11905	1 sht. (32" x 54") 12 sq.ft.
DYNAPAD [®]	21100	1 sht. (32" x 54") 12 sq.ft.
DYNASHIELD [®] HEAT SHIELD	23101	1 sht. (10" x 12") .83 sq.ft.
DYNASHIELD [®] HEAT SHIELD	23102	1 sht. (15.5" x 19") 2 sq.ft.
